

ADS-TEC presents innovative firewall solution for reliable network security, connectivity and IIoT functionality

Implementing an industrial firewall for CODESYS Docker applications is a crucial step towards ensuring security and scalability in modern industrial automation. With the ADS-TEC Firewall product line, we offer a multi-functional solution that not only enables secure remote maintenance via different cloud services without vendor connectivity but helps as well to protect your assets according to the latest security standards such as NIS-2 and the Cyber Resilience Act (CRA).

Integrating with existing surveillance systems and adding IIoT capabilities is easy with the protected docker environment of our products. This allows companies to future-proof their systems while saving resources and costs. The flexibility and performance of our firewall series ensures that your equipment not only meets current needs but is also designed to meet future challenges.

Visit ads-tec Industrial IT GmbH at the CODESYS booth on the SPS fair Nuremberg:
Hall 7, Booth 677.

About ads-tec Industrial IT GmbH

ADS-TEC Industrial IT GmbH, headquartered in Nürtingen near Stuttgart, is a wholly owned subsidiary of ADS-TEC Holding GmbH and a family-run technology company that has been developing and producing IT systems for the industrial environment for over 40 years. The product portfolio includes industrial PCs, machine and vehicle terminals & displays, firewalls, routers and custom products for Industry 4.0. The company's own IIoT service platform completes the offering.
